DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. **Claims 1-8, 13-16 and 20-32** are drawn to wireless device tasking usage according to its provider, thus being classified in class 455, subclasses 406-408.

II. **Claims 9-12 and 33-43** are drawn to the wireless device determining whether its roaming which is also a determination of its classification, thus being classified in class 455, subclasses 432.1 and 445.

III. **Claims 17-19** are drawn to wireless device that is switched between a pre-paid platform into a post-paid platform, thus being classified in class 455, subclasses 418 and 419.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions define different functions in a wireless communications systems.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III, restriction for examination purposes as indicated is proper.

Art Unit: 2686

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
